

27 October 2011

ASX : NAE

ASX ANNOUNCEMENT**Quarterly Report to 30th September 2011**

New Age Exploration Limited (“NAE” or “the Company”) is pleased to provide shareholders with its quarterly report for the three months to 30th September 2011.

During this quarter, NAE undertook the successful acquisition of a number of hard coking coal projects in Colombia in addition to completing a A\$4m private placement.

Highlights

- **Successful acquisition of FL2-151 exploration and mining concession and the JBI-11091 exploration and mining concession application**
- **Expansion and mechanisation agreement signed with owners of the Terranova hard coking coal mine**
- **Commencement of Terranova scoping study and appointment of scoping study manager**
- **Completion of a A\$4m private placement to Resource Capital Funds (“RCF”) and Mr. Chee Siew Yaw**

NAE’s Colombian coal strategy, which was announced earlier this year, continues to be well received by the market and investors, demonstrated in particular by our successful A\$4m private placement, which was completed at a premium to our share price during a period of intense market volatility.

The Company intends to utilise the funds raised to advance its coking and thermal coal project portfolio within Colombia, with particular emphasis on the Terranova hard coking coal mine expansion and mechanisation project.

NAE is currently reviewing a number of additional potential coking and thermal coal opportunities to add to its portfolio, with a primary focus on opportunities within Colombia.

Subachoque Hard Coking Coal Project

During the quarter, NAE acquired an exploration and mining concession (FL2-151), a concession application (JBI-11091) and signed an agreement to mechanise and expand the Terranova hard coking coal mine (887T contract). The FL2-151 concession, JBI-11091 concession application and the Terranova hard coking coal mine are all located within the Subachoque Syncline, located approximately 15km to the west of Zipaquira in the Cundinamarca Province, Colombia.

Zipaquira is approximately 45km to the north of Bogota. Zipaquira is a large regional centre with a population of 100,000 and acts as a transport and support hub to the coking coal mines in the surrounding area.

Figure 1 Location of Subachoque Concessions

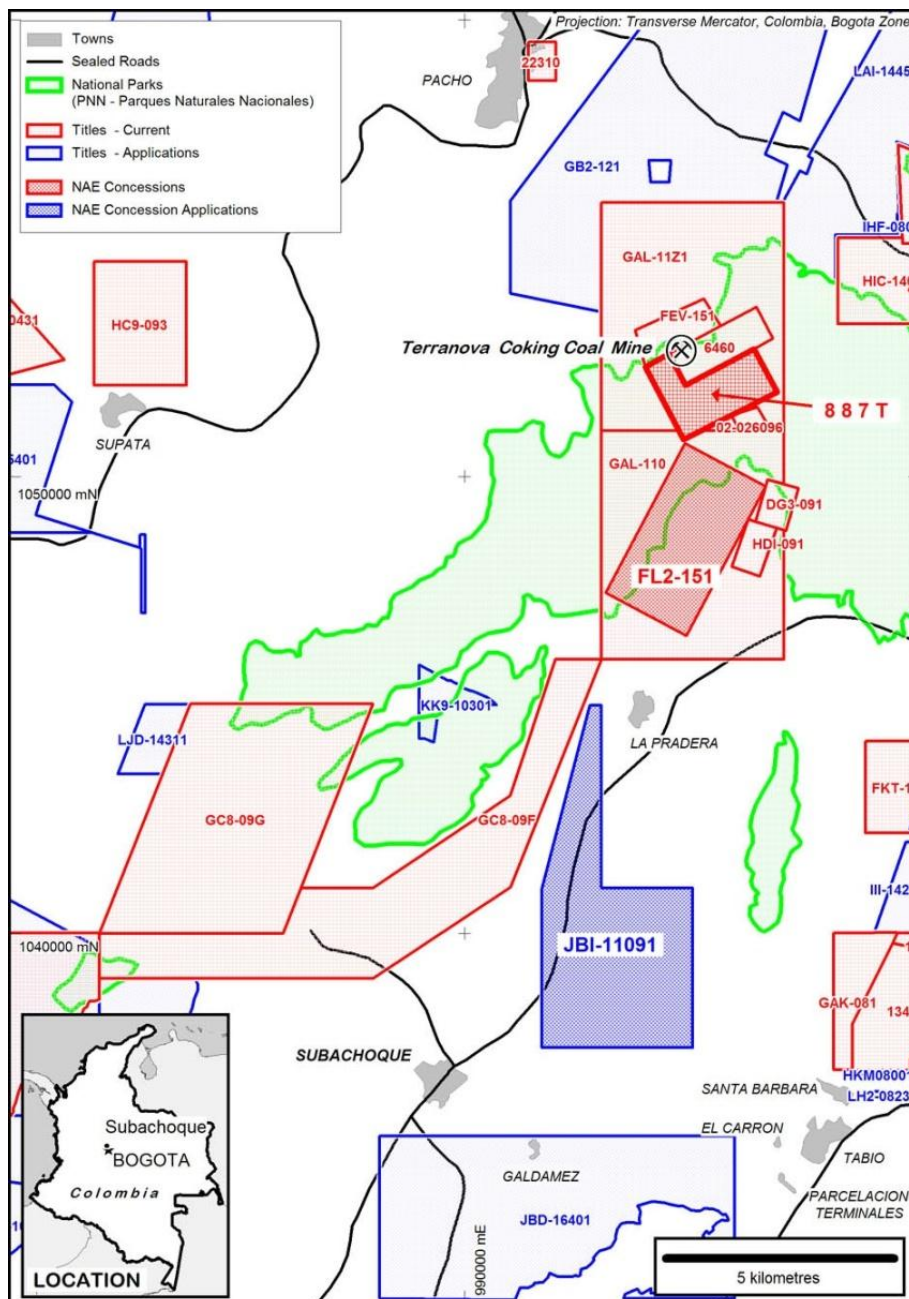

Table 1 Subachoque Project JORC Exploration Target Estimates

Concession	JORC Conceptual Exploration Target (Mt)	Coal Quality
JBI-11091	20-40	Medium volatile hard coking coal
FL2-151	10-18	Medium volatile hard coking coal
887T	5-6	Medium volatile hard coking coal
Total	35-64	Medium volatile hard coking coal

During the quarter, NAE commenced geological mapping on the FL2-151 and JBI-11091 concessions.

For further information, please refer to the press releases:

27th July 2011 *Successful Acquisition – First Colombian Coking Coal Project*

3rd August 2011 *Second Successful Coking Coal Acquisition in Colombia*

Terranova Mine Expansion and Mechanisation Project

The Terranova mine is located at the head of the Subachoque Valley (Figure 1) and consists of the licence 6460 and mining (*exploitation*) contract 887T. The Terranova mine has been operated for several decades and produces approximately 25,000 tonnes per annum of medium volatile hard coking coal by traditional mining methods. Output is currently sold as raw coal to Colombian based coke producers and to traders for export as hard coking coal.

Table 2 Terranova Project indicative operating parameters

Target seams	M2 (Grande) M3 (Dos Bancos)
Production rate (saleable coal)	Year 1: 150 to 200ktpa Year 2: 200 to 300ktpa
Mine life	2 – 2.5 years
Production start	Mid 2012
Capital expenditure	US\$10-20m
Cash cost (mine gate)	US\$30-50/t
Transport costs	US\$40-50/t
Port costs	US\$10-20/t
FOB operating cash cost	US\$80-120/t
Life of mine cumulative saleable production	500-750kt hard coking coal
Source: BBB Consultants and NAE	

The Terranova mine is located within a Parques Naturales Nacionales (“PNN”) and is currently unlikely to have the current operating licences renewed when they are scheduled to expire in August 2012 (licence 6460) and October 2014 (mining (*exploitation*) contract 887T). NAE has signed an agreement with the project owners to mechanise and expand production from mining (*exploitation*) contract 887T and the Company and the project owners have agreed to work together with the aim to extending the mining (*exploitation*) contract 887T beyond the terms of its current scheduled expiry in October 2014. The Terranova indicative project parameters are set out in Table 2.

During the quarter, the Company commenced the Terranova scoping study and recruited Jim Black, a highly experience project manager to manage the Terranova scoping study.

NAE views the Terranova project as a first step in building a long term operating presence in the Zipaquira area and of the majority of the capital investment in the Terranova project, particularly the coal preparation plant, will be available at the end of the project life in 2014 to be utilised in the development of the Company’s other concessions in the Zipaquira area.

2nd September 2011

Key Appointments – Terranova Mine Mechanisation Team

Successful Completion of A\$4m Private Placement

NAE successfully closed an A\$4m capital raising during the quarter. The placement was undertaken in two tranches, with the initial tranche involving the issuance of 12 million ordinary shares under the Company’s existing placement capacity on 27th September 2011, with the outstanding balance of shares (21.34 million ordinary shares) being issued subject to shareholder approval at the Company’s upcoming Annual General Meeting scheduled to be held on the 9th of November, at the RACV Bayside Room #6, Level 2, 501 Bourke Street, Melbourne 3000 at 10.30am.

The capital was raised through an institutional investor, RCF, and a sophisticated investor, Mr Chee Siew Yaw. RCF is a group of mining-focused private equity funds, currently actively investing their fifth fund (Resource Capital Fund V L.P.) which has committed capital of US\$1.02 billion, and Mr Chee Siew Yaw is a successful Singaporean businessman and investor and is seeking to further his investments in the natural resources sector.

NAE was particularly pleased to have completed this placement, at a 9% premium to the closing price on the 19th of September and a 14% premium to the 10 day VWAP ending on the 19th September 2011, during the intense volatility that has gripped the global share markets over the past quarter.

The Company views this placement as a vote of confidence in its current strategy and is pleased to welcome RCF and Mr Chee Saw Yiew to its share register.

For further information, please refer to the press release:

22nd September 2011

Completion of A\$4 million Placement to Advance Colombian Projects

New Age Exploration JORC Exploration Target

Table 3 New Age Exploration JORC Exploration Target Estimates

Concession	JORC Conceptual Exploration Target (Mt)	Coal Quality
Subachoque Project	35-64	Medium volatile coking coal
Cesar Export Project	250 -1,000	Export thermal coal

Competent Persons Statement:

Information in this document that relates to Exploration Results is based on information compiled by Dr Frederick Smith, who is a Fellow of the Institute of Materials, Minerals and Mining. Dr Smith is a Director and Shareholder of Aurora Energy S.A and the Managing Director and Principal Consultant of FWS Consultants Ltd. Dr Smith has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Dr Smith consents to the inclusion in the documents of the matters based on his information in the form and context in which it appears.

The potential quantity and grade of the exploration target is conceptual in nature as there has been insufficient exploration conducted to define a Mineral Resource and it is uncertain if further exploration will result in the determination of a Mineral Resource.

About New Age Exploration Limited:

New Age Exploration's main focus is securing mineral resource investment opportunities which have the potential to add significant value to shareholders and to deliver on the Company's strategic objective:

"To focus on mineral resource projects with a view to identifying economically attractive deposits of sufficient grade and size to provide sustainable returns to shareholders".

NAE is currently focused on building a portfolio of coal projects in Colombia and has recently acquired two coking coal exploration and mining concessions, located within the Subachoque Syncline, which hosts high quality hard coking coal deposits in Cundinamarca, Colombia.

New Age Exploration recently announced the acquisition of the FL2-151 exploration and mining concession approximately 5 kilometres north of the recently acquired concession application JBI-11091 and adjoins the Terranova hard coking coal mine concession to the north. Terranova is a well-established deposit currently producing 25 ktpa of high quality medium volatile hard coking coal.

In addition to the newly acquired coking coal assets, the company also holds two concessions in the world class Cesar Basin, where a conceptual exploration target of 200-800 million tonnes of export quality thermal coal has been identified.

As part of its ongoing strategy NAE continues to evaluate a number of projects in Colombia and elsewhere which will add value to the Company's portfolio.

Notes

1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity

wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.

2 The Nature of interest (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.

3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.

4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.

5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
