

QUARTERLY REPORT

TO 30 SEPTEMBER 2015

New Age Exploration Limited ("NAE" or "the Company") is pleased to provide shareholders the Company's Quarterly Report for the period ending 30 September 2015.

HIGHLIGHTS

The significant milestones achieved by New Age Exploration Limited ("NAE" or "the Company") during this period include:

- **Commencement of a detailed technical and economic review the Redmoor Tin-Tungsten-Copper project (to be completed in CY2015 Q4)**
- **Activities on the Lochinvar Coking Coal Project have been curtailed**
- **Other projects opportunities continue to be assessed**

ACTIVITIES REPORT

LOCHINVAR COKING COAL PROJECT, UK

The Lochinvar Coking Coal Project is located on the Scottish / English border and has been the Company's principal focus since the grant of the initial exploration licence and conditional underground mining licence in June 2012. All licences are in good standing and are 100% owned by NAE.

The October 2014 Scoping Study⁽¹⁾ showed attractive economics for Lochinvar (US\$263M NPV at a long term hard coking coal price of US\$165/t). However, coking coal prices have fallen significantly since completion of the study. Over the past year, there have been many mine closures worldwide, yet coking coal prices remain at cyclical lows with CY2015 Q4 hard coking coal contract prices recently being settled at US\$89/t.

As a result of current low coking coal prices and market conditions, the Board has decided to curtail work on the Lochinvar project until coking coal prices improve. The licences will be maintained in good standing and we will continue to build on the strong community and stakeholder relationships we have established on the project.

The Board is confident that the medium to long term outlook for coking coal remains strong due to the shortage of good new supply projects which we expect will struggle to meet medium to long term demand growth driven principally by China and India (albeit at reduced growth rates).

With FOB costs of US\$70/t in the lowest quartile of the global seaborne coking coal cost curve, Lochinvar is extremely well positioned to take advantage of the next market upturn and the Board remains confident in the value of Lochinvar. We will continue to monitor market conditions and it is our intention to re-commence activity at Lochinvar when coking coal prices improve sufficiently.

REDMOOR TIN-TUNGSTEN PROJECT, UK

NAE holds a 15-year exploration licence with modest annual payments over the Redmoor Tin-Tungsten-Copper project in the historic mining district of Cornwall, United Kingdom. The licence is in good standing and is 100% owned by NAE.

An initial Inferred Resource of 9.1Mt at 0.69% Sn equivalent⁽²⁾ was defined for Redmoor by SRK in February 2013.

Since the February 2013 Inferred Resource statement, limited work has been conducted at Redmoor by the Company due to the focus on the Lochinvar Coking Coal Project.

Following the decision this year to curtail activities at Lochinvar, the Company commenced a detailed technical and economic review of the Redmoor Project. The review is aimed at more accurately understanding the value of the Redmoor project and is expected to be completed in CY2015 Q4 including the following:

- Re-validation of the historic drilling data
- Updated geological interpretation and orebody model
- Updated resource statement which will separate the high grade Johnsons Lode from the remainder of the Sheeted Vein System mineralisation at Redmoor
- Review of other high grade lodes historically worked within NAE's Redmoor exploration licence aimed at identifying additional high grade lode exploration targets
- Review of Redmoor processing options
- Review of Redmoor underground mining options
- Other internal studies

Whilst there is ongoing interest from third parties in acquiring the Redmoor asset, the Company intends to firstly complete its technical and economic review to determine how the project can best add value to shareholders. This may include pursuing further exploration and evaluation activities on the project, a farm-in arrangement or an asset sale.

The Directors believe that outlook for tin and tungsten is reasonably positive in the short to medium term.

CORPORATE

Reduction in Spending

The Board has acted quickly to substantially reduce costs to a minimum level in order to preserve cash and we ended the quarter ending 30 September 2015 with \$312,304 in cash plus approximately \$592,000 undrawn under the funding facility in place with RCF (a total of approximately \$904,304 available).

Other Activities

The Company continues to pursue additional project opportunities.

NEW AGE EXPLORATION PROFILE

New Age Exploration Limited is an Australian company focused on coking coal exploration and development. Its flagship project is the 100% owned Lochinvar Coking Coal Project in the UK which is ideally located to supply domestic UK and European steel mills with immediate access to existing rail and port infrastructure.

In October 2014, NAE released the results of its Scoping Study for the Coking Coal Lochinvar Project which demonstrated attractive economics based on forecast long term coking coal prices. The Lochinvar Scoping Study was based upon a 1.4 Mt annual saleable coking coal production over a 26 year mine life from an underground longwall mine with costs at the lower end of the global seaborne coking coal cost curve.

NAE also owns 100% of the Redmoor Tin-Tungsten project in Cornwall, UK.

NOTES

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements and petroleum tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement or petroleum tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Financial Reporting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.

In accordance with ASX Listing Rule 5.3.3, New Age Exploration Limited provides its list of exploration licences with its June 2015 quarterly activities report.
